

CYBERCRIME INFRASTRUCTURE RECONSTRUCTION

Trace infrastructure. Preserve what remains.

Public-source infrastructure discovery, historical reconstruction
and evidence correlation from a single target.

SELECTED RELATIONSHIP

PLAIN-LANGUAGE EXPLANATION

example.net currently resolves to 203.0.113.10 based on observed DNS records. This indicates that the domain is actively using this IP address.

RELATIONSHIP TYPE	FIRST SEEN	LAST SEEN	EVIDENCE COUNT
CURRENT-RESOLUTION	2024-11-02	2026-09-28	12

RAW PREDICATES (VISIBLE)

dns.a dns.aaaa dns.current

GRAPH LEGEND

	CURRENT-RESOLUTION	Directly observed relationship
	PROBABLE-LINK	High-confidence association
	INFRASTRUCTURE-TRANSITION	Infrastructure change over time

Visual line styles improve readability only.
Evidence semantics remain unchanged.

INTERACT WITH THE GRAPH

Click a node to focus its neighbourhood.
Click a relationship to inspect why two entities are connected. Raw predicates remain visible.
